Sinker Longleaf Pine specifications:

- Salvaged from virgin growth river recovered Longleaf Pine logs cut and lost pre-1925.
- Colors are mixed chocolate, amber, olive, and red tones with some yellow sap streaks.
- 100% heartwood face. Approximate moisture content is 12%.
- Dimensions: Flooring: 3/4" x 2-1/4" to 7" face or custom. Lumber: 3/4" to 1-1/2" x 2-1/2" to 7-1/4" or custom. Beams: 4x4 to 12x12x20' and larger according to log availability. Sold freshly sawn, wet.
- Hardness is 1225 on the Janka scale, comparable to Red Oak (1290).
- Flooring is ordered by the linear foot and is trimmed to provide 100 percent usable material for the grade. Lengths are random, 2' and longer. Standard milling is T&G center-match pattern with equal wood above and below the tongue. The tongue is tapered to ease installation.
- Custom milling patterns and specific lengths are available for a premium.
- Grades:

Common grade is a blend of vertical and arching grain. It includes unlimited size and number of knots with slight cracking & checking for a distressed look. No loose knots.

Select grade is a blend of vertical and arching grain. It includes a few small knots. No loose knots

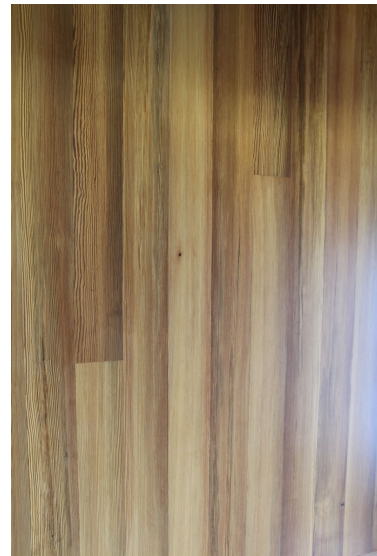

Vertical grade has fine, delicate straight grain, no growth rings more than 45 degrees perpendicular to the face of the board. It includes almost no knots. Widths up to 5" and lengths of 4' minimum. No loose knots.
